

Regulatory and Compliance Leaders

Pharma Solutions has quickly established itself as the industry leader in providing state and federal compliance solutions to the drug and device supply chain. We have developed a team of industry veterans who bring unique answers to the multitude of complex regulatory obstacles presented by varying state and federal agencies.

State & Federal Regulatory Compliance

Our expertise lies within the ever-evolving and cumbersome burdens of state and federal regulation within the drug supply chain. We've assisted over 500+ clients in obtaining 5,000+ state licenses, achieving compliance with the FDA and DEA, streamlined operational and quality processes, and more.

Technology Solutions

We've developed two world-class software solutions to address the burden of licensing management and suspicious order monitoring. **ATLAS** is a powerful platform developed to simplify license management and **NavigateSOM** automates risk reduction practices for better DEA compliance of controlled substances.

Our Clientele

Pharma Solutions has worked with over 15+ business models across a diverse array of challenges, including manufacturers, distributors, wholesalers, third-party logistic providers, re-packagers, pharmacies, healthcare providers, and more.
